FRONT-END DEVELOPMENT

ASSIGNMENT 1 TEMPLATE

STUDENT NAME: PRATHESH T

YEAR: II-YEAR

COLLEGE CODE: 355

COLLEGE NAME: GOVERNMENT ARTS AND SCIENCE COLLEGE
TIRUPATTUR-635901

DEPARTMENT: B.C.A

SEMESTER: IV

ROLL NO: 35524U09027

NMID: 2A4D31C34924CA181484303D75D33CFC@NM2026.IN

DATE: 19-02-2026

PROJECT TITLE: SIMPLE EVENT REGISTRATION PAGE

1.Assignment and Assumptions:

1.1.Assignment:

The proposed assignment is to design and develop a **Simple Event Registration Page** using HTML, CSS, and JavaScript.

The web page allows users to:

- View event details
- Enter personal information
- Select event preferences
- Submit registration details
- View registered participants (static table)

1.2.Purpose:

The main objective of this assignment is to understand and implement the fundamentals of front-end web development.

By completing this project, I aim to:

- Learn how to structure a web page using HTML
- Design and style web elements using CSS
- Add basic interactivity using JavaScript
- Create and manage HTML forms
- Understand user input handling

2.Problem Statement:

In many colleges and organizations, event registration is often handled manually, which can be timeconsuming and inefficient. There is a need for a simple digital platform where participants can easily register for events.

This project provides a web-based solution where users can:

- View complete event details
- Register online by filling out a form
- See a list of registered participants

This makes the registration process faster, organized, and user-friendly.

3.Expected Features:

3.1 Event Title and Description

Event Name: Tech Innovators Workshop 2026

Description:
Tech Innovators Workshop 2026 is a technical event focused on emerging technologies, web development trends, artificial intelligence, and cybersecurity. The workshop aims to enhance students' technical skills and provide networking opportunities with experts.

3.1. Event Title and Description:

This section includes:

- Event Information
- Registration Form
- Personal Information
- Event Selection
- Additional Details
- Declaration
- Form Controls

3.2. Event Information & Registration Form Section:

- Event Date: 25 March 2026
- Time: 10:00 AM – 4:00 PM
- Venue: ABC College Auditorium
- Organizer: Department of Computer application
- Registration Form – Sample Filled Data
- Personal Information
- Name: faraz
- Email: 24bcanm11@gmail.com
- *Phone Number: 9042186082*

Sample:

Registration Form – Sample Filled Data

Personal Information

- **Name:** XYZ
- **Email:** xyz@gmail.com
- **Phone Number:** 9876543210
- **Date of Birth:** 12/02/2006
- **Gender:** Female

3.3. Registered Participants Section

Name	Email	Phone	Event	Mode

3.4. Footer Section:

The footer includes:

- Contact Email: support@techinnovators.com
- Help Desk: +91 98765 43210
- Copyright: © 2026 Tech Innovators Workshop. All Rights Reserved.

This section provides support and copyright information.

4.Implementation Steps:

The following steps were followed to develop the project:

1. Created the basic HTML structure using <!DOCTYPE html>, <html>, <head>, and <body>.
2. Added the event title and description using heading and paragraph tags.
3. Created the event information section using a table.
4. Designed the registration form using <form>, <input>, <select>, <textarea>, and <fieldset> elements.
5. Added form validation using required attributes.
6. Created a registered participants table with sample data.
7. Added a footer section with contact information.
8. Styled the page using basic CSS (if applied).
9. Tested the form functionality in the browser.

---

5. Technologies Used:

The following technologies were used:

1. **HTML**
   - Used for structuring the web page
   - Created forms, tables, and layout

2. CSS

- Used for styling the page
- Improved layout, spacing, and design

3. JavaScript

- Used for form validation
- Added interactivity (if implemented)

6.Output:

The final output includes:

- Event Title and Description
- Event Information Table
- Registration Form
- Registered Participants Table
- Footer Section

7.Learning Outcome:

By completing this assignment, I learned:

- How to create structured web pages using HTML • How to design forms and collect user input • How to create tables to display data • Basic validation techniques • Importance of user interface design • Practical implementation of front-end development concepts

---

8. Conclusion:

The Simple Event Registration Page was successfully designed and developed using HTML, CSS, and JavaScript. The application allows users to view event details, register online, and see participant information in a structured format. This project helped in strengthening my front-end development skills and understanding of web technologies.
